***Event Presented by:
and the RFID Technology Council***

About The RFID Technology Council

The RFID Technology Council is an Ad Hoc organization with the mission to promote the understanding of radio frequency identification (RFID) technologies and their impact on the US and global economy, by delivering to the general public, public officials and industry professionals, informative, educational events and panel discussions on RFID issues and uses. The Senate RFID Caucus is Co-Chaired by Senators Byron Dorgan (D-ND) and John Cornyn (R-TX). The RFID Technology Council's website can be found at www.RFIDTechCouncil.org.
