

CAROLE C. CAREY

Carole has been a member of IEEE since 1986 when she was a student at Johns Hopkins University Whiting School of Engineering's electrical engineering program. In 1990, she joined the FDA Center for Devices and Radiological Health (CDRH) as a scientific reviewer in the Office of Device Evaluation. In this capacity and as team leader, she was responsible for the evaluation of pre-market submissions from the medical device industry. From 2003-2005, she served as a Fellow in the Mike Mansfield Fellowship Program, (an program administered by the State Department). Carole spent her second year in Tokyo working with her regulatory counterparts in Japan's Ministry of Health, Labour and Welfare and the Pharmaceutical and Medical Devices Agency. Currently, she is the Director of FDA CDRH International Staff and focuses on global harmonization programs and development of international standards. As an IEEE volunteer she has served and continues to serve IEEE in various capacities at the local, regional, national and international level. While in Japan, she formed the Women in Engineering Affinity Group, Japan Council. She is an elected AdCom member of IEEE EMBS (Engineering in Medicine and Biology Society) and chairs the EMBS Standards Committee. She is also the 2007 Region 2 PACE Coordinator.
