

HOWARD RICHARD LIEBERMAN

Howard Richard Lieberman has three decades of experience as an innovator in audio, computing, and education. He founded the Silicon Valley Innovation Institute to develop and apply a conscious innovation model internationally, in order to turn Vision into Value.

Mr. Lieberman has founded five companies: Interactive Visual Analysis Languages (INTERVAL), Integrated Acoustics, Escatech Media Inc., Dorado and Asonda Corp. Mr. Lieberman has invented and brought to market new technologies at Bose Corporation, Apple Computer and the companies he founded, including hardware and adaptive content software architectures.

He has developed measurement systems at Bose, JBL, Boston Acoustics, and Apple Computer, contributed to standards committees and consulted to Tektronix, 3Com, Amdal, Cienna, Sun, Kurzweil, Ensoniq, JBL, Walmart, Harman Intl., Bose, Apple, Boston Acoustics, and Fishman Transducers and ASA, AES, IEEE member.

Prior to founding SVII, Howard was the Dean of External Affairs and Distinguished Lecturer of Innovation Management and Aesthetic Engineering for Cogswell Polytechnical College, a 120 year old technical institution in Silicon Valley.

Mr. Lieberman has also worked in Intellectual Property and been a member of the Silicon Valley Intellectual Property Association (SVIPLA), the Intellectual Property Society (IPS), the Licensing Executives Society (LES), and has recently chaired a Summit on the Globalization of Technology and chaired the SCI3 Foundation Board. Howard Lieberman holds a BS in Physics from the City University of New York, an MS in Electrical Engineering from the University of Rhode Island and has Post Graduate work at the Massachusetts Institute of Technology in Acoustics & Image Processing.
