

JEAN M. EASON

Jean Eason received a BS in EE from the University of Texas in 1978, an MS in EE from Southern Methodist University in 1984 and an MBA from Texas Christian University in 1989. Her early career focused on the aerospace industry and she spent fifteen years working in avionics systems design and developing advanced cockpit displays for military and commercial, fixed and rotary wing aircraft. She is self-employed, working with clients on specialized applications for small businesses and in technical communication and documentation.

Jean's time in aerospace gave her particular insight into the issues affecting engineering professionals. Her work in the area of employment assistance for engineers in North Texas was recognized by the State of Texas in the report, Defense Transition: Economic Promise for Texas from the Governor's Task Force on Economic Transition (1993). This led directly to her involvement with IEEE-USA and its employment and career services.

Jean has been an active volunteer for more than twenty years, addressing member needs at every level from the local section to the Board of Directors.
