

KRISTI BROOKS

Kristi Brooks received her BSEE from North Dakota State University (NDSU). Upon graduation, she started to work as a product development engineer for General Motors, focusing on the in-tank fuel pump. While there, she also had the opportunity to work as a manufacturing engineer in plants that created various automotive parts including engine valves and instrument clusters. She also spent three years working as a manufacturing engineer for John Deere in one of their engine plants. Currently, she works for an engineering consulting firm in Moorhead, MN. In her spare time during the week and on week-ends she volunteers at the local schools and with her church.
