

ELIZABETH JOHNSTON

Mrs. Johnston received her Bachelor's of Science in Electrical Engineering in December 2006 and her Bachelor of Arts in Russian Studies degree in May 2007, both from the University of Alaska, Fairbanks. Ms. Johnston's professional activities include experience working for university, state, and federal government as well as private engineering and architecture design firms. As a student she worked for three years for the U.S. Army Corps of Engineers on military projects. In 2005 she worked with IEEE-USA as a Washington Internships for Students of Engineering public-policy intern, writing a policy paper on the future of hybrid electric vehicle technology. In 2006 she served as an honors intern for the Federal Bureau of Investigation, working for the International IT Support Unit. Currently she works as an architectural electrical engineer for a firm in Fairbanks, Alaska and is pursuing a Masters Degree in Engineering Science Management. She is also a competitive fencer.
