

Edward G. (Ed) Perkins

Ed Perkins currently works as a consultant in IT Governance, risk management and risk auditing; process automation; and technology documentation, and holds a Certified Internal Auditor designation. He has over 30 years industry experience, in electronic design automation, program and project management, mixed-signal test development, design services management, chip architecture development, software development, and real time systems programming. He has worked as design services manager for a telecom start-up, as a program manager in the Virtual Test Division of IMS in Beaverton, Oregon, and 16 years at Digital Equipment Corporation, 10 years in the central engineering CAD department where he was responsible for management of CAE services and support to engineering groups worldwide and before that as principal software engineer in real-time operating systems. He has been an IEEE volunteer for 25+ years. He is a Senior Member of IEEE and is Past Chair of the Oregon Section, has served as Region 6 Membership Chair, past Chair of the IEEE-USA Career and Workforce Policy Committee, and is Region 6 Director-elect 2009-10. He has a BSEE and MSCS from WPI (Worcester, MA) and most recently an MS ECE specializing in VLSI design and test from Portland State University (Portland, OR).
