

April 16, 2008

The Honorable George W. Bush
United States President
The White House
1600 Pennsylvania Avenue, NW
Washington, DC 20500

Dear Mr. President:

As leaders of America's business, academic and research communities, we are deeply concerned about the state of our country's competitive position in the world. Though there are many issues relevant to protecting our interests in the global marketplace, none is more pressing than the need for additional funding for scientific research and science, technology, engineering and mathematics (STEM) education.

As you work with Congress on a supplemental appropriations request for the current fiscal year, we ask that you remain open to the inclusion of funding for scientific research and STEM education in any legislation presented to you for signature.

Such action will allow for the fulfillment of the commitments made in your *American Competitiveness Initiative* and in the *America COMPETES Act* signed into law last summer.

As our country struggles to stabilize our economy and build for the future, an immediate commitment to research and education funding is both timely and relevant. This is an urgent and necessary step that will enhance our country's economic strength, our competitiveness and allow for continued innovation.

Sincerely,
