

Dave Goldstein is a multi-talented [hands-on] electric and hybrid vehicle expert with a unique 30-year perspective of both federal government and industry efforts to develop electric and hybrid vehicles in response to America's growing dependence upon foreign oil and rising environmental concerns.

He is founding member of the nonprofit Electric Vehicle Association of Greater Washington, serving as President since 1980, and a former Washington Representative for the [now defunct] Electric Vehicle Industry Association.

He has served on DOE transportation energy, advanced batteries, and PHEV advisory groups and provides consulting services to entrepreneurial EV and advanced battery firms, Program Development Associates.

As a policy analyst and "big picture" thinker, Dave currently moderates the Electric Transportation track on [OurEnergy&Policy.com](http://OurEnergy&Policy.com), and otherwise tends to work quietly behind the scenes promoting Transportation Energy.

He is a member of the nationwide Electric Auto Association and IEEE and is a recent addition to the IEEE-USA Energy Policy Committee.
